Tools	GitHub VsCode FireBase Vercel Netlify Crome Dev Tools

PROJECTS

Fluent Verse | Language Club

[Live link](#)[client side link](#)[server side link](#)

- User management, instructor management, class management, and class feedback can all be managed by the admin
- Class can be added by instructor and my class can be viewed by instructor
- If a class seat is available, the student can select all classes and pay through Stripe. However, if the student does not login, the student cannot access the dashboard.

Technologies React Vite, tailwind css , daisyUi, expressjs, mongodb, react from hook, Firebase, jwt , axios etc.

TOY-PLANET | Sports toy store

[Live link](#)[client side link](#)[server side link](#)

- Toys can be viewed, added, edited, and deleted by logging in. In the event that a non-logged-in user clicks on a toy's details, they will be redirected to the login page etc.
- Updates users on current toy models in real time. Users can add new toys from the add to toys menu if they are logged in
- When the user is logged in and has added a toy, they can see just that toy in the My Toys section.

Technologies React Vite, tailwind css , daisyUi, expressjs, mongodb, react from hook, Firebase, jwt , axios etc.

choosyFoody | resturent site

[Live link](#)[client side link](#)[server side link](#)

- When registered users click on a cheap detail, they can view the recipe for the dish. After successfully logging in, non-registered users will be redirected to the recipe details page.
- After logging in, the user is directed to the recipe page when he clicks on the view recipe button. There is a rating of each recipe, a price and ingredients listed in this page
- There are some questions and answers on the blog page.

Technologies React Vite, tailwind css , daisyUi, expressjs, React Router Dom
